

# Does Biodiversity Matter?

We now know some things about biodiversity and why it is important. We have also studied the biodiversity in our local area. We know that animals have special requirements that have to be met in order to survive in a particular habitat. Now we want to use our new knowledge to see if we can improve biodiversity in our local area.

## Proposal

Whats your idea?  
What will you do?  
How will you do it?  
How will you know if it has been successful?  
How will you measure your success?

## Do it!

Document your project as you go along.

**Documenting**  
Written journal  
Photo journal  
Podcast journal  
Video  
Photos

## Evaluate your project

Did you achieve what you set out to do?  
How do you know?  
What evidence have gathered to support your evaluation?

## Present your project

Your presentation will need to be engaging and informative.  
Test your presentation with a small audience. Can you use their feedback to improve your work?

**Presentation**  
Short film  
Display  
Podcast/Radio program  
Written report  
Multimedia presentation  
Website

## Reflect on your learning

What was important about this project?  
Where could you use this knowledge in the future?  
What new skills did you learn?  
What recommendations could you make about biodiversity to others as a result of your work?
